

QUALITY OF LIFE

Madison, Wisconsin. It's a great place to live, work and play! Madison has beautiful lakes, bike trails, parks and year-round recreation. We offer a unique blend of activities that can only come from being both a state capital and a university town. Madison has great culture with a vibrant and diverse arts community. Our local economy is thriving with world-class companies that draw professionals from all over the world. Our community values inclusion, education and environmental stewardship. There's no place quite as wonderful as Madison, Wisconsin!

Are you ready to embark on a new adventure? Come live in a wonderful place, work with motivated and talented colleagues, and prepare to do the exceptional: to help redefine the future of renewable energy.

WORK YOU CAN BE PROUD OF

"The Virent co-op program exposed me to alternative fuels. I really liked working on big issues and solving problems that matter to the world."

"Virent's co-op program showed me different disciplines of chemical engineering. I gained valuable experience in plant operations, research and development, and process development."

VIRENT IS REPLACING CRUDE OIL.

VIRENT

WELCOME TO THE VIRENT CO-OP PROGRAM!

Participation in Virent's co-op program can have a big impact on your appeal as a job candidate after graduation, but our program is designed to give you much more than marketability. At Virent, you'll be doing chemical engineering for one of the biofuel industry's most promising companies.

- Put your skills to work on real project teams doing actual research and development. Our co-op employees are vital contributors in company initiatives.
- Join the exciting, growing field of green technology. The sustainable production of fuels and chemicals is critical to our future, and you can get in on the ground floor.
- Develop confidence in your skills and abilities. Our senior scientists will be with you every step of the way, while giving you freedom to innovate, problem solve and make a difference.

VIRENT IS REPLACING CRUDE OIL.

WON'T YOU JOIN US?

Virent is applying clever chemistry to create the chemicals and fuels the world demands from a wide range of naturally occurring, renewable resources.

Using our patented catalytic chemistry, Virent is converting soluble biomass-derived sugars into products molecularly identical to those made with petroleum, including gasoline, diesel, jet fuel, and chemicals used for plastics and fibers.

By replacing crude oil, Virent is creating economic security, energy independence and a healthier world.

REAL TECHNOLOGY FOR THE REAL WORLD

Consumers, and the companies who serve them, are demanding sustainable, earth-friendly alternatives to products processed from crude oil. Virent's technology creates products that can replace over 90% of the products made from petroleum.

Do you want to be part of the excitement, meeting the challenge of providing the renewable energy the world needs?

Join our team by applying online at Virent.com.
